Event Description

This webinar intended for tri-service emergency management agencies (police, fire, ambulance/paramedic) will provide information about the need for educating your organization, public outreach, and how the messages should be coordinated to reduce public confusion about NG9-1-1; Real Time Text (RTT) - the need for preparation, how to test, its workings and how it will impact your call-takers (at ALL PSAPs); the urgency of the new Go-Live date; how you properly plan for Business Continuity, pre-rollout testing and integration testing; a real case of a smaller PSAP amalgamating with a larger PSAP as a way of solving the NG9-1-1 budget crunch.
